

NEW BUILDING

ROUSSEAU PARK

With Rousseau Park in Ludwigsfelde, between Berlin and Potsdam, a holistically designed neighborhood was built. In this project, the focus was on a high quality of living for the people. Living space was created here that harmonizes the elements of sustainability, inclusion, individuality and social encounters.

In this way, a settlement with flats and single-family houses has been created, where mainly young families have fulfilled their dream of living in the countryside and have come together to form an urban community.

The entire area has been beautifully landscaped and in 2021 was even awarded the "Prize of the Brandenburg GaLaBau - Most Beautiful Site in a Residential Area".

Some of the buildings were equipped with DoorBird's high-quality IP video door stations. A total of six door stations and 94 indoor stations were installed in six buildings. The installation went smoothly and the tenants are thrilled with the easy operation.

REQUIREMENTS

- ✓ Easy commissioning
- ✓ Good price-performance ratio
- ✓ Online management and administration from a distance
- ✓ Modern design

ADVANTAGES

- ✓ Quick delivery
- ✓ Excellent service
- ✓ Flexibility for changes in the usage concept
- ✓ WiFi function of the indoor station
- ✓ Subsequent expandability of the system modules
