SIP PHONE CALL ADDON

powered by

The DoorBird Phone Call Addon powered by AVLinkPro is an optional SIP services which enables your DoorBird intercom to call IP, cellular and landline phones in addition to sending push notifications to smart devices. The DoorBird Phone Call Addon can be used in multi-tenant, commercial or single-family residence projects. It is the ideal solution for any project requiring door communication using both smart devices and one or multiple phonelines.

EASY INSTALLATION AND CONFIGURATION

- Simply provide 1 Cat cable to DoorBird location
- No need to rewire old systems
- No need to pull new wire to apartments
- No need to provide intercom speakers
- Dual-tone multi-frequency (DTMF) signaling capable
- Flexible and scalable, configure phone calls for some apartments but not for others
- Update number of apartments configured for phone calls as needed

The DoorBird Phone Call Addon is a cloud-based solution powered by DoorBird partner, AVLinkPro.

To activate the DoorBird Phone Call Addon, go to <http://ittendant.com>. After paying a one-time activation fee and the first year subscription fee, you will receive Instructions for configuring the DoorBird App and your DoorBird partner SIP account. The yearly subscription fee is based on the number of units being called. Once activated, the DoorBird Phone Call Addon is billed annually.
