

HIGH-TECH FOR THE
CONSTRUCTION SECTOR

THE LARGESCALE PROJECT IN UNTERSCHLEISSHEIM

REQUIREMENTS

- ✓ Simple commissioning
- ✓ Good price-performance ratio
- ✓ Online management and administration remotely
- ✓ Modern design

OVERVIEW

ADVANTAGES

- ✓ Quick delivery
- ✓ Outstanding service
- ✓ Flexibility for changes to the utilization concept
- ✓ WLAN function of the indoor station
- ✓ Subsequent expandability of the system module

Six avant-garde building complexes with a total rental area of around 80,500 square meters. This forms the foundation for the new, contemporary urban district in Unterschleißheim, which is characterized by the motto "The future here is already the present."

Sustainability has been a key consideration in the design and construction of Koryfeum's six buildings, with the use of state-of-the-art materials and digital technologies being a matter of course.

Each of the buildings was to be equipped with an IP video door intercom system that allows residents and staff to see and communicate with visitors even when they are not on site.

INSTALLED:

- Towers with D21x display, keypad and third-party reader module
- Several D21 devices in the individual buildings
- A1101 indoor stations white edition with table-stands A8003 for the individual tenants/offices
