

REFERENCE PROJECT  
MAINZER STREET  
IN HOFHEIM

## REQUIREMENTS

- ✓ Easy installation and quick commissioning
- ✓ Good price-performance ratio
- ✓ Online management and remote administration
- ✓ Modern design that is easy to integrate

## OVERVIEW

Skyline-Bau.com, a renowned regional project and property developer based in Hofheim, has continuously expanded its successful presence in the Rhein-Main region since its foundation in 2010.

One of its most recent projects is an exclusive apartment block with five residential units located on Mainzer Street. In this project, particular attention was given to the integration of a DoorBird system in the entrance area.

Alongside a high-quality outdoor station featuring five individual call buttons, five elegant indoor stations of the A1101 model were installed. This innovative solution not only enables residents to maintain visual contact with arriving guests but also allows them to communicate with them even if they are not physically at home. This valuable security and convenience feature is greatly appreciated by residents.

## DOORBIRD PRODUCTS:

- D2105V Door Station
- Five IP Video Indoor Stations A1101

### ADVANTAGES

- ✓ Quick delivery
- ✓ Outstanding service
- ✓ Flexibility for changes to the utilization concept
- ✓ WLAN function of the indoor station
