

SYSTEM REQUIREMENTS

- DoorBird IP Video Door Station D10x/D11x/D20x/D21x.
- Iddero VERSO INDOOR touch panel.

ADDITIONAL INFORMATION

The following guide will take you through setting up a DoorBird IP Video Door Station in connection with an Iddero VERSO INDOOR touch panel.

Please ensure the Iddero touch panel receives an IP address and is connected to the same local network your DoorBird IP Door Door Station is connected to. Please also make sure that your DoorBird is online, using this service:

https://www.doorbird.com/checkonline.

The local IP address of your DoorBird is available from the same page.

1. SETTING UP THE IDDERO VERSO INDOOR TOUCH PANEL

- Note: The Iddero VERSO INDOOR touch panel is configured through **ETS tool**, the standard configuration software for KNX products which is available for download from https://www.knx.org.
 - 1. Enable the "Door phone" option in the Main > General section:

| Main | Project name | | |
|------------------|-------------------------------|----------------------|--|
| General | Distanciantation | O Partait @ Landaura | |
| Network settings | Display orientation | Portrait U Landscape | |
| Timer groups | Enable date/time objects | | |
| User interface | | | |
| Door phone | Send read requests at startup | O No Yes | |
| | Thermostat 1 | | |
| | Thermostat 2 | | |
| | Inputs | | |
| | Internal scenes | | |
| | Door phone | | |
| | Cameras | | |

All companies, logos and product names are registered trademarks of the respective companies. Errors and omissions excepted – Last Update 12/2023 - Copyright © 2023 - ASSA ABLOY – www.doorbird.com

2. Enable at least one door in the **Door phone > General** section:

| Main | Door station 1 | |
|----------------|----------------------------------|--|
| User interface | Door station 2 Door station 3 | |
| Control page 1 | Door station 4 | |
| Door phone | Door station 5 Door station 6 | |
| General | Door station 7 | |
| Door station 1 | Door station 8 | |
| | Additional doorbell | |

3. Select "Door station 1" to show its configuration parameters:

| 1.1.3 Iddero Verso INDOOR | > Door phone > Door station 1 | |
|---------------------------|-------------------------------|---|
| + Main | Door phone type | Doorbird 👻 |
| + User interface | Name | |
| + Control page 1 | Caller ID | |
| - Door phone | Video Show video | Built-in camera Alternative camera Always |
| (Door station 1) | Open doors via | HTTP SIP (DTMF) |
| | Open door icon | 🕼 180. Door open 👻 |
| | Enable extra button | |
| | IP address Username | 0.0.0.0 |
| | Password | |
| | Enable events | |

- a. In the Door phone type drop-down menu, select "DoorBird".
- b. Enter an arbitrary name for the DoorBird IP Video Door Station in the **Name** field, e.g. "DoorBird". This name will be shown in the touch panel user interface.
- c. The **Caller ID** field is only needed when more than one door station is configured. If used, it must match the "SIP User" configured in the DoorBird door station.
- d. Video field: an external camera can be selected, instead of the DoorBird built in camera
- e. The **Show video** field determines when video will be shown. If more than one indoor monitor is used, it is recommended to set this to "Only during calls".

- f. The **Open doors via** parameter determines how the touch panel controls the door switches. By default, it is set to "HTTP" to send commands as HTTP requests. This can optionally be changed to "SIP (DTMF)" which uses DTMF codes instead. In this case:
 - You will need to enter DTMF codes for the main door and optionally (see below) for the courtesy light.
 - The DTMF functionality must also be enabled and configured in the Door Station.

Note: The transmission of DTMF codes is only possible during an active call.

- g. The **Enable extra button** parameter allows to configuration of an additional button that can be used to control a courtesy light.
- h. Enter the IP address field to the IP address of your DoorBird IP Video Door Station.
- i. Set the **Username** to the App username of your DoorBird IP Video Door Station (e.g. "user0001") and enter the corresponding password into the **Password** field.

A widget ("component") must be added to the user interface so that the user can navigate to the door phone page at any time.

For example, if we want to configure component 1 on page 1:

1. Make sure "Page 1" is enabled in the User interface > General section:

| 1.1.3 Iddero Verso INDOOR | > User interface > General | |
|------------------------------------|----------------------------|--|
| + Main | Page 1 | |
| User interface | Page 2 Page 3 | |
| General | Page 4 | |
| Power saving mode | Page 5 Page 6 | |

2. Go to Control page 1 > General and enable "Component 1":

| 1.1.3 Iddero Verso INDOC | OR > Control page 1 > General | | |
|--------------------------|-------------------------------|-----------------|---|
| + Main | Name | | |
| + User interface | lcon | (none) | • |
| - Control page 1 | Page layout | Fixed positions | * |
| v consorpege r | Restrict page access | O No 🔿 Yes | |
| General | | | |
| Component 1 | Component 1 | ✓ | |
| t Door phone | Component 2 | | |
| - ever prierie | Component 3 | | |

3. In the Component type drop-down, select "Door phone page link":

| 1.1.3 Iddero Verso INDOO | R > Control page 1 > Component 1 | | |
|--------------------------|----------------------------------|----------------------|---|
| + Main | Name | \bigcap | |
| + User interface | Component type | Door phone page link | • |
| - Central area 1 | Button icon | 180. Door open | • |

2. SETTING UP THE DOORBIRD IP VIDEO DOOR STATION

For the DoorBird IP Video Door Station to be properly able to communicate with the Iddero touch panel, the DoorBird device's SIP settings must be adjusted accordingly.

- 1. Open the DoorBird App and log into the **Administration** by clicking the "gear" symbol in the bottom right and scroll to **FURTHER FUNCTIONALITY.** Enter the user and password credentials from the "DIGITAL PASSPORT" document that was shipped with your DoorBird IP Video Door Station.
- 2. Under **EXPERT SETTINGS**, select "SIP Settings" and enable "SIP activated" Optionally (only required if configuring multiple door stations), enter a value in the "SIP user" field (this must match the "Caller ID" configured in the Iddero touch panel).

| SIP Settings | Save | SIP Settings | Save |
|---------------|------|---------------|------|
| SIP SETTINGS | | SIP SETTINGS | |
| SIP activated | | SIP activated | |
| | | SIP Proxy | |
| | | SIP User | |
| | | SIP Password | |

3.Enable the "DTMF", and enter the "Relay 1 PIN" (and optionally the "Light PIN") to the respective DMTF codes entered during configuration of the Iddero touch panel.

| DTMF | | DTMF | • |
|-------------|-------------|-------------|-----|
| Light PIN | Light PIN | Light PIN | 123 |
| Relay 1 PIN | Relay 1 PIN | Relay 1 PIN | 456 |

- 4. Go back to the main administration area, under FAVORITES and tap on "SIP Numbers", then tap "Add".
- 5. In the subsequent screen, enter an arbitrary name in the **Name** field, e.g. "Iddero". For the **SIP address**, enter the IP address of your Iddero touch panel, prefixed with any arbitrary name or SIP user ID and an "@"-symbol, e.g., "user@x.x.x.x"

| | SIP Calls Save | SI | P Calls Save |
|-------------|--------------------|-------------|--------------|
| SIP CALLS | | SIP CALLS | |
| Name | Name | Name | Iddero |
| SIP address | 108@192.168.123.22 | SIP address | user@x.x.x.x |

The schedule for the doorbell needs to be properly set up. Depending on the model of the DoorBird IP Video Door Station, choose one of the following options:

A) For all devices with a single call button (e.g. D1101V, D2101V, D2101KV, etc.), find the corresponding settings in the DoorBird App administration menu **EXPERT SETTINGS** when selecting "**Schedule for doorbell**".

In this screen, tap the bell symbol in the upper-left corner, select "SIP call" and fill out the schedule as per your requirements for this event.

B) For all devices with multiple call buttons (e.g. D2102V, D2103V, D2112V, etc.), find the corresponding settings in the DoorBird App administration menu **BUTTON CONFIGURATION** when selecting "**Settings**".

Select the call button the event needs to get assigned to and go to "Schedule for actions".

In this screen, tap the bell symbol in the upper-left corner, select "SIP call" and fill out the schedule per your requirements for this event.

C) For all devices outfitted with a digital display module (e.g. D21DKV), find the corresponding settings in the DoorBird App administration menu **KEYPAD** when selecting "**Settings**".

Select or create a new PIN code. Under VALIDATION select "Schedule for actions".

In this screen, tap the bell symbol in the upper-left corner, select "**SIP calls**" and fill out the schedule per your requirements for this event.

Hint: By tapping the button in the upper right corner it is possible to fill or clear the entire schedule.

| < | lo | ldero | | * | > [| | 6 ~ | < | Ic | Idero | | ~ | |
|----|----|-------|----|----|-----|----|------------|----|----|-------|----|----|----------|
| мо | TU | WE | TH | FR | SA | SU | \diamond | MO | TU | WE | TH | FR | |
| | | | | | | | 00:00 | | 1 | | | | 1 |
| | | | | | | - | 00:30 | | - | | | | - |
