ANSWER YOUR DOOR ANYWHERE.

With DoorBird you never miss a visitor.

SMART RETROFITTING

The DoorBird D301A converts a conventional analog door intercom system into an IP door intercom system. With the innovative retrofit module, you receive the perfect solution for the smart entrance door without having to replace your existing system. Tenants in apartment buildings and house owners who cannot replace their existing equipment, enjoy all the benefits of a smart door intercom with the D301A.

EASY TO INSTALL

The D301A consists of a small white box that you simply connect to the existing indoor station via a cable. The functional scope of the indoor station is completely preserved. The D301A is then connected to the Internet via WiFi or, alternatively, via network cable or PoE. All the functions of the D301A can be configured comfortably via the DoorBird App which is available free of charge for iOS and Android.

SUPPORTED BRANDS

### ADVANTAGES

- Excellent audio quality
- Door / gate opening via App
- Call tone differentiation for front door and storey call
- WiFi, Ethernet, PoE
- No ongoing costs, not even for the remote access
- Encryption according to bank standard
- Unlimited range (LAN, Internet)
- Automatic door opener
- Visitor history
- Geofencing
- Open API
- Integration possibilities for corporate customers, e.g.: Delivery services, home & elderly care
- Made in Germany
